PERSONAL PROJECTS - CODINGMAMMOTH

Entrepreneur: Founder of CodingMammoth since 2008

QuickScale

Application for Mac OS X offering all essentials tools and features for batch image resizing.

Fully written in Objective-C.

Monday 2 June 2014

Semonto: Server Monitor Tool (SAAS-service)

Semonto is a Server Monitor Tool. Designed to alert users directly when a server went offline or has issues, so the server owner can react quickly to solve the problems. Using Ruby/PHP, MySQL as main technologies, running on multiple servers for redundancy.

MijnLijn

Free app (iOS) to retrieve easily the first busses of a bus stop of the Belgian company “De Lijn”. It allows users to locate stops using their current location, searching in database of ~40 000 stops.

TreinErvaring.be

Free app (iOS+WebApp) which collects all tweets about the NMBS (Belgian National Train company). All messages (most of them customer experiences) are showed on the website and the iOS-app. The list is sorted on the votes by the community.

Some older (discontinued) projects

Backpack: A flash card application for students.

UGentResto: Free app (iOS+WebApp) for students of Ghent University to show the current resto menu. (obj-c, PHP5, MySQL)

MyVikings: A free iOS application for ‘Mobile Vikings’ (Belgian MVNO) to check your balance.

CMCrashReporter: Small framework for developers to collect crash logs automatically (Objective-C)

EDUCATION

Ghent University: Bachelor Informatica - Computer Science.

Studies temporarily interrupted due to increasing opportunities for CodingMammoth.

SKILLS

Experienced	Good	Basic
Objective-C (+Touch)	C	Ruby
Database (SQL)	Java	
GIT	Linux Servers	
Mac OS X	Networking	
Scrum - Agile	PHP (OO)
